Cautionary Statement with Respect to Forward-Looking Statements

Statements made in this annual report with respect to COMSYS Holdings' plans and benefits as well as other statements that are not historical facts are forward-looking statements, which involve risks and uncertainties. Potential risks and uncertainties include, without limitation, general economic conditions in COMSYS Holdings' markets, exchange rates, and COMSYS Holdings' ability to continue to win customers' acceptance of its products, which are offered in highly competitive markets characterized by continual new product introductions and rapid developments in technology.

* Compiled based on the content of COMSYS Holdings' Annual Securities Report submitted in Japanese.

Profile

COMSYS Holdings Corporation (the "Company") was established in September 2003 as a holding company through share transfers from three companies—Nippon COMSYS Corporation, SANWA ELEC Co., Ltd. (now SANWA COMSYS Engineering Corporation) and HIGASHI NIHON System Construction Co., Ltd. (now TOSYS Corporation).

The COMSYS Group (the "Group") consists of the Company and 89 subsidiaries and 18 affiliates, in addition to 8 core operating subsidiaries, specifically Nippon COMSYS Corporation, SANWA COMSYS Engineering Corporation, TOSYS Corporation, TSUKEN Corporation, NDS Co., Ltd., SYSKEN Corporation, Hokuriku Denwa Kouji Co., Ltd. and COMSYS JOHO SYSTEM Corporation.

The business domain of the COMSYS Group encompasses various construction businesses ranging from carrier-related electrical and telecommunications facilities to ICT related facilities and social system-related facilities, both of which have high growth potential. Social system-related businesses include improvement projects of urban environments, renewable energy projects such as solar power, and various infrastructure projects which support the foundation of social and economic activities.

COMSYS Group Management Philosophy

At the COMSYS Group, we are united as a Group and strive for strong partnership and collaboration with diverse external players in achieving our management philosophy.

- We will build a company that customers continue to choose through the construction of diverse infrastructure that carries our era forward.
- ▶ We will contribute to our country and local communities by building social infrastructure that supports affluent lifestyles.
- We will continue with unrelenting reform in our aim to further increase corporate value.

President's Message

Create the Future through Continuous Transformation

August 2019

Takashi Kagaya

Takashi Kagaya President and Representative Director

Performance for the FY ended March 2019

Looking at our performance for the FY ended March 2019, orders received were a record-high ¥505.5 billion, up ¥103.3 billion year on year, and net sales reached a new all-time high of ¥481.7 billion, an increase of ¥101.7 billion. These results were primarily attributable to consolidation of the three companies in the telecommunications construction industry—NDS Co., Ltd., SYSKEN Corporation, and Hokuriku Denwa Kouji Co., Ltd.—effective October 2018, as well as solid trends in orders received and net sales.

On the profit front, following on from the previous fiscal year, we continued to deliver record-high profits as we steadily completed a large volume of construction projects. Operating profit was ¥35.2 billion, up ¥4.9 billion year on year, and profit attributable to owners of parent was ¥28.0 billion.

The operating profit ratio decreased 0.7 of a percentage point year on year to 7.3% due to the impact of the

consolidation. However, the operating profit ratio was 0.1 of a percentage point above target.

The contract backlog rose to its highest-ever level of ¥183.1 billion, up ¥23.5 billion year on year, due to a positive impact from the business consolidation of the three companies, in addition to solid orders received.

Business environment surrounding the COMSYS Group

In the information and communications field, the COMSYS Group's principal area of activity, value-added services such as content provisioning have been expanding amid intensifying competition among telecommunications carriers over services. With the rapid growth in higher-volume data traffic driven by the expansion of these services, mobile networks are being upgraded to cope with the burgeoning data traffic.

Moreover, in the public and private sectors, social infrastructure investment offers prospects for growth in

Information

such areas as initiatives to build national resilience through disaster readiness and mitigation measures in preparation for increasingly severe natural disasters, policies on renewable energy, and the 2020 Tokyo Olympic and Paralympic Games. Growth is also anticipated in ICT investments that harness new innovations, such as the Internet of Things (IoT) and Artificial Intelligence (AI).

Business plan

In the NTT Engineering business, we foresee substantial increases both in orders received and net sales due to the positive impact of the consolidation. Efforts will also be focused on reducing costs through the elimination and integration of redundant operations. In the NCC Engineering business, we aim to get further orders from Rakuten Mobile, Inc., a new telecommunications carrier in Japan, in addition to solid orders received from KDDI (au) and SoftBank. In the

IT Solutions and Social System-Related businesses, which are positioned as core businesses for growth, we will accelerate expansion in orders received and net sales by promoting the virtual company system which is operated by aggregating the same business segments across operating companies, including the three consolidated companies.

Based on these factors, in our business plan for the FY ending March 2020, we are targeting orders received of ¥537.0 billion, an increase of ¥31.5 billion year on year, and net sales of ¥540.0 billion, an increase of ¥58.3 billion. Operating profit is forecast at ¥38.0 billion, up ¥2.9 billion, while the operating profit ratio is projected to decrease 0.3 of a percentage point to 7.0%.

COMSYS VISION NEXT STAGE 2023

The COMSYS Group has endeavored to increase the top line of business mainly by expanding business in the private sector and conducting M&As, along with reducing

COMSYS VISION Achieved COMSYS VISION 2020 ahead of the original schedule **NEXT STAGE 2023** ¥400 billion or more ¥600 billion or more Net sales: Net sales: ¥30 billion or more ¥50 billion or more Operating profit: Operating profit: Maintain an approximate total return ratio of 70% (Billions of yen) ¥600 billion or more ¥540.0 Grow by 30% or more ¥481.7 ¥82.5 Increase the top line of business **50%** ¥75.0 Expand existing fields further Enter new fields M&As IT Solutions Grow by or more Net sales ¥166.5 **Business** ¥331.3 20% or more ¥136.7 ¥52.4 Social System-¥40.3 Related Business Generate profits by creating consolidation synergies **NTT Engineering** 50% Maintain ¥291.0 Improve efficiency through structural reforms ¥269.9 Business ¥238.6 net sales or below **NCC Engineering** Share a common IT platform Business **2023** Targets 2018 2019 Forecasts 2013 Fiscal year (2020.3) (2019.3)(2024.3) (2014.3)¥27.5 ¥35.2 ¥38.0 Operating profit ¥50 billion or more (8.3%)(7.0%)(8% or more) (Operating profit ratio)

costs through drastic structural reforms. As a result, in the FY ended March 2019, we successfully realized "COMSYS VISION 2020," which set forth our medium-term targets to date, ahead of the original schedule. In order to advance to the next stage, we have formulated a new medium-term vision titled "COMSYS VISION NEXT STAGE 2023," which runs through the FY ending March 2024. Our specific targets are to generate (1) net sales of ¥600.0 billion or more and (2) operating profit of ¥50.0 billion or more by the FY ending March 2024, and to (3) maintain an approximate total return ratio of 70% that time frame.

We will implement the following measures to realize the medium-term vision. In the IT Solutions and Social System-Related businesses, our core businesses for growth, we will promote the virtual company system, with the aim of expanding net sales further. Moreover, we will seek to enter new fields and expand our business areas by actively implementing M&As and partnerships. In the carrier-related business, we will facilitate the generation of profits by creating consolidation synergies. Operations will be more efficient, implementing measures such as the consolidation of subsidiaries and integration of business sites at an early stage, along with sharing a common IT platform.

By coming together as "One COMSYS," the COMSYS Group will work tirelessly on a daily basis to realize "COMSYS VISION NEXT STAGE 2023" ahead of the original schedule.

Shareholder returns

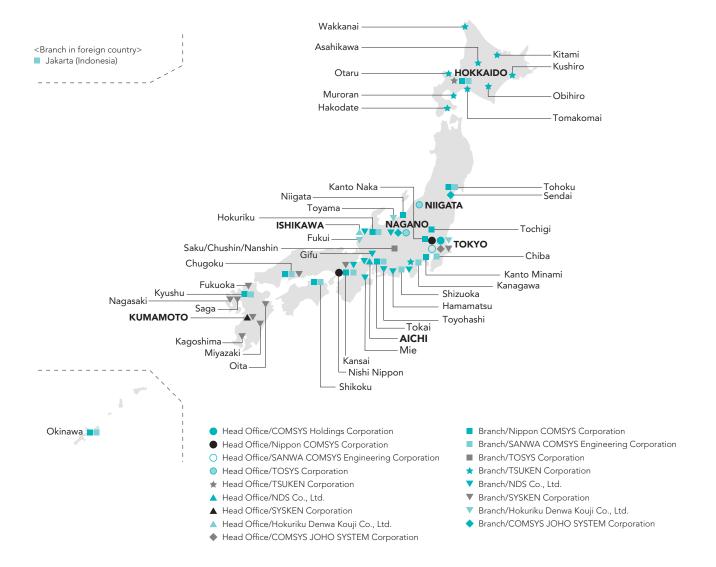

With regard to the return of profit to shareholders for the FY ended March 2019, we have set an annual dividend of ¥60 per share and acquired treasury stock of ¥8.0 billion. For the dividends per share for the FY ending March 2020, considering the expected business performance and dividend payout ratio, we plan to pay an annual dividend of ¥75 per share (¥35 for the interim dividend and ¥40 for the year-end dividend), which is an increase of ¥15. Furthermore, we have decided to acquire treasury stock of up to ¥5.0 billion.

We sincerely request the continued support and understanding of all our stakeholders, as we endeavor to reach our goals.

Eight Integrated Business Groups

As of March 2019, the COMSYS Group consists of COMSYS Holdings and 115 subsidiaries and affiliates. Its main businesses are the construction of electrical and telecommunications facilities and ICT-related facilities.

Nippon COMSYS Corporation

COMS4S

Business Activities

With its primary customers consisting of the NTT Group, public offices, and private enterprises, the Nippon COMSYS Group is engaged in the construction of electrical and telecommunications facilities on a nationwide scale.

Review of Operations and Outlook

NTT Engineering Business

Orders Received / Net Sales

FY ended March 2019 Performance and Business Activities

Orders received for the FY ended March 2019 were ¥222.9 billion, a ¥38.4 billion increase compared to the FY ended March 2018 and ¥7.9 billion more than planned due to the effects of consolidation, strong performance in the access line construction business and electric power equipment renewal.

Net sales were ¥226.8 billion, a ¥40.9 billion increase year on year and ¥11.3 billion over the plan due to the effects of consolidation and steadily working on the ample contract backlogs.

Outlook for FY ending March 2020

Orders received are projected to increase by ¥9.5 billion year on year to ¥232.5 billion and net sales are expected to increase by ¥19.6 billion to ¥246.5 billion due to the effects of consolidation despite a decrease in capital investment by NTT East, NTT West and NTT DOCOMO.

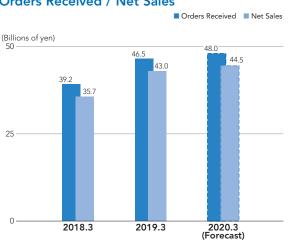

Future Outlook

In the NTT fixed-line business, net sales are forecast to gradually decline over the long term as capital investment by NTT East and NTT West continues its decreasing trend despite being supported by promotion of optical fiber services, conversion to IP based networks, expansion of the access network in conjunction with the rollout of 5G, and increase in maintenance work.

In the NTT mobile business, 5G pre-services will start from September 2019 and 5G commercial services from spring 2020, but full-scale 5G construction is thought likely to occur from 2021 onward. Net sales are projected to remain constant as NTT DOCOMO's capital investment is forecast hold steady over the long term.

NCC Engineering Business

Orders Received / Net Sales

FY ended March 2019 Performance and Business Activities

Orders received for the FY ended March 2019 were ¥46.5 billion, a significant increase of ¥7.3 billion compared to the FY ended March 2018 and ¥3.5 billion more than planned due to the effects of consolidation and brisk receipt of orders from au and SoftBank.

Net sales were also strong at 443.0 billion, an increase of 47.3 billion year on year and 42.0 billion more than the plan because of the effects of consolidation and front-loaded orders for au base station construction.

Outlook for FY ending March 2020

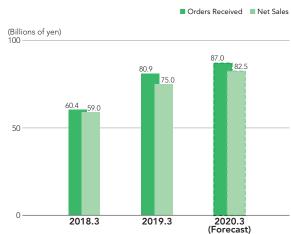

Capital investments by KDDI and SoftBank remain strong, and orders received are expected to increase by ¥1.4 billion to ¥48.0 billion compared to the FY ended March 2019 as we anticipate upgrades of SoftBank's LTE base stations to support 5G and increased orders resulting from constructions for au's new 1.7 GHz frequency band and quality improvement measures. Net sales are also projected to increase by ¥1.4 billion to ¥44.5 billion year on year.

Future Outlook

Capital investment by KDDI and SoftBank is expected to remain at a high level going forward. Rakuten Mobile, Inc., a new mobile telecommunications carrier in Japan, has plans to significantly accelerate its 4G base station deployment plan and we will actively seek to receive orders for this work. Commercial services for 5G will start from spring 2020, but full-scale 5G construction is forecast to occur from 2021 onward.

Orders Received / Net Sales

FY ended March 2019 Performance and Business Activities

Orders received for the FY ended March 2019 were ¥80.9 billion, an increase of ¥20.4 billion compared to the FY ended March 2018 and ¥4.9 billion more than planned due to the effects of consolidation and strong project acquisition in all sectors.

Net sales were \$75.0 billion, an increase of \$15.9 billion year on year and \$2.5 billion more than the plan due to the effects of consolidation and robust software development.

Outlook for FY ending March 2020

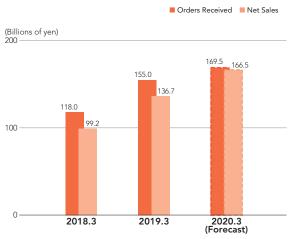

Orders received are expected to increase by ¥6.0 billion to ¥87.0 billion and net sales are projected to increase by ¥7.4 billion to ¥82.5 billion due to the effects of consolidation, software development and growth in server storage-related business.

Future Outlook

The IT market is forecast to remain strong from now on with expected average annual growth rates of 10% in the IoT market and 21% in the cloud services market. We will promote further alliances in such high growth markets as cloud services and IoT to capture new customers. We will also expand sales through cross-selling and applying the alliance business model across Group companies. Furthermore, we will promote the virtual company system and take on the challenge of creating new business by providing solutions supporting all layers including software, networks and maintenance.

Social System-Related Business

Orders Received / Net Sales

FY ended March 2019 Performance and Business Activities

Orders received for the FY ended March 2019 were ¥155.0 billion, an increase of ¥37.0 billion compared to the FY ended March 2018 due to the effects of consolidation and acquisition of large-scale projects. However, orders received marginally failed to achieve their target, falling short of the plan by ¥0.9 billion.

Net sales also increased by ± 37.5 billion year on year to ± 136.7 billion due to the effects of consolidation and an increase in solar power generation facility construction, but fell short of the plan by ± 4.2 billion due to the effects of delays in some projects.

Outlook for FY ending March 2020

Orders received are forecast to increase by ¥14.4 billion year on year to ¥169.5 billion and net sales are projected to increase by ¥29.7 billion year on year to ¥166.5 billion due to the effects of consolidation, last-minute demand of the mega-solar projects, and accelerated growth in the electrical and communications sector as well as infrastructure sector related to civil engineering for water supply, sewerage and agricultural water.

Future Outlook

Like the IT Solutions business, we position the Social System-Related business as a core business for growth. We will aim to expand the business in three sectors: electrical communications, renewable energy, and infrastructure.

In the electrical communications sector, we will promote acquisition and bolstering of peripheral businesses, such as those related to air conditioning and sanitation facilities, in addition to our core businesses in electrical and communications facilities. We will focus on nationwide expansion from the Tokyo metropolitan area.

In the renewable energy sector, we will acquire maintenance contracts for solar power systems and new renewable energy projects such as biomass power, etc.

In the infrastructure sector, we will actively take part in Private Finance Initiative (PFI) projects for undergrounding utility poles promoted by the Ministry of Land, Infrastructure, Transport and Tourism and the future PFI projects in water and sewerage as well as educational institution facilities.

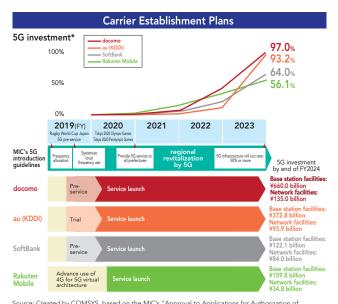

Topics

Orders start for fifth-generation mobile telecommunications systems (5G)

The Ministry of Internal Affairs and Communications allocated 5G frequencies to the four telcos in April 2019, and they have moved to start pre-5G services from fall 2019 and commercial 5G services from spring 2020.

The ministry plans to systemize Local 5G from fall 2019. Local 5G refers to 5G that can only be used in a limited area, with various envisaged uses such as smart factories that automatically control production lines, remote operation of heavy machinery, disaster-prevention systems and telemedicine.

As the largest company in the telecommunications construction industry, the COMSYS Group will not only build 5G communications networks throughout Japan, but will also contribute to implementation of various services using 5G in each of the communities.

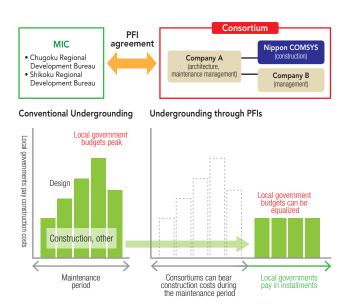

Source: Created by COMSYS, based on the MIC's "Approval to Applications for Authorization of Establishment Plans on Specified Base Stations for Spreading 5G Mobile Communications Systems"

Order received from PFI to underground utility poles

Nippon COMSYS Corporation received orders for Private Finance Initiative (PFI) projects for putting telephone lines underground in Shimane and Ehime Prefectures for the FY ended March 2019.

The Ministry of Land, Infrastructure, Transport and Tourism is promoting projects to underground utility poles, but the rate of achievement in local governments is sluggish, ranging from 0-5% across all prefectures due to their limited budgets. PFI projects have been trialed to resolve the financial problem by equalizing payments for local governments and enabling payment necessary for construction. Nippon COMSYS Corporation recently participated in a PFI project with the ministry's Chugoku and Shikoku regional development bureaus as a consortium member and was designated as a company to perform the construction work.

Going forward, we will aim to take part in undergrounding projects rolling out throughout Japan. We can then expand our participation in other PFI projects related to water and sewer services, and cultural institutions and more by leveraging the expertise and knowledge acquired through the undergrounding projects.

^{* 5}G infrastructure rollout rate: Ratio of meshes established for high-capacity 5G base stations, with coverage throughout Japan divided into 100 km² meshes (about 4,500).

Corporate Governance

Basic Corporate Governance Philosophy

The COMSYS Group recognizes that strengthening corporate governance is important to improve corporate value. By striving to achieve this, the COMSYS Group aims at becoming a company that can be trusted and highly evaluated by all stakeholders through its actual performance.

To realize stronger corporate governance, the COMSYS Group considers it is essential to establish transparency and soundness in corporate management. The COMSYS group makes all possible efforts to ensure appropriate information disclosure, to promote the observance of compliance, to strengthen risk management, to rigorously implement the COMSYS Group's code of conduct, to tighten internal control, and to contribute to society based on our business activities.

■ Organizational Structure

The Company transitioned to the company with the audit and supervisory committee system as its corporate governance structure at the 14th General Shareholders' Meeting held on June 29, 2017. The corporate governance system comprises a General Shareholders' Meeting, Board of Directors, Audit and Supervisory Committee and other organizations.

The audit and supervisory committee system is characterized by strong supervisory functions of the Board of Directors with a structure enabling rapid decision-making. The Company aims at achieving further increase in corporate value through the transition to this system.

The Board of Directors comprises internal directors who are well-versed in the Company's operations and outside directors who monitor management from an independent standpoint, with an aim of enhancing management effectiveness. Meanwhile, the Company has reinforced auditing functions with its Audit and Supervisory Committee members in order to ensure and enhance

soundness in management.

The Company delegates important decisions on business execution to directors in accordance with the provisions in its Articles of Incorporation and by the resolution of the Board of Directors.

This system enables swift decision-making and nimble business execution, while allowing the Board of Directors to focus exclusively on supervising business execution.

As of June 25, 2019, the Board of Directors comprises nine directors and six directors who are also Audit and Supervisory Committee members, including five outside directors. The board holds regular meetings in accordance with the Board of Directors Rules, as well as ad hoc meetings as required. The board makes decisions on statutory matters as well as important matters related to management and supervises their business execution.

Every quarter, directors responsible for each business segment report to the Board of Directors about progress of their business execution based on policies determined by the board. Also, each business segment effectively operates under the supervision of the responsible director.

The Senior Management Committee is made up of directors other than outside directors and the full time Audit and Supervisory Committee members. In principle, this committee meets once a month to examine, discuss, and pass resolutions on issues related to key decisions, in an effort to improve the efficiency of business execution.

The heads of each operating department and certain other personnel attend meetings of the Senior Management Committee as observers, as necessary, to ensure that they fully understand the basis for all management decisions.

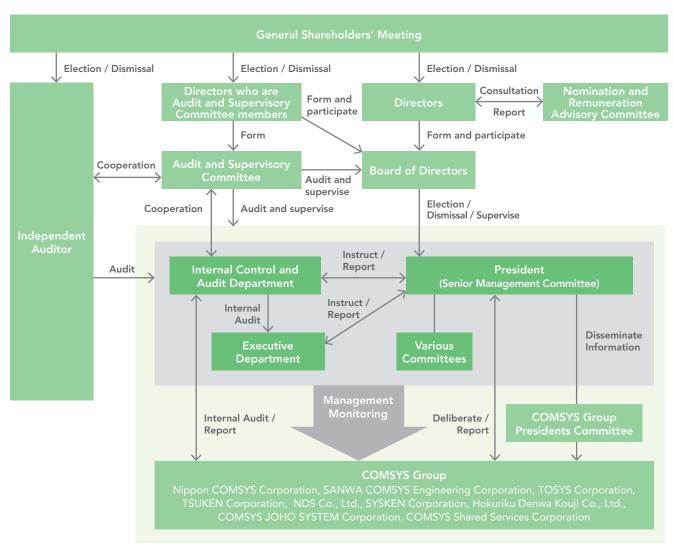

Moreover, to strengthen the independence, objectivity, and responsibility of the functions of the Board of Directors, the Company has established the Nomination and Remuneration Advisory Committee, which includes outside directors, to receive appropriate contributions and

advice from outside directors on particularly important matters such as nominations and remuneration. The

composition of the Nomination and Remuneration Advisory Committee is as follows:

Position	Name
President and Representative Director	Takashi Kagaya
Director of Human Resources Department	Hitoshi Kumagai
Outside Director (Audit and Supervisory Committee Member)	Masahiko Miyashita
Outside Director (Audit and Supervisory Committee Member)	Kazuyoshi Onohara
	President and Representative Director Director of Human Resources Department Outside Director (Audit and Supervisory Committee Member)

Diagram of the COMSYS Group's Business Execution Framework, Management Monitoring and Internal Control System

■ Status of the Internal Control System

The Company implements its internal control system based on a "Basic Policy on Establishing an Internal Control System" that was approved by resolution of the Board of Directors as follows.

■ Establishing a Compliance Structure

The Company has formulated its internal Compliance Program, has set forth Compliance Action Guidelines within this framework, and has established the Compliance Committee.

This committee, which is chaired by the president, is made up of representatives from the Company and each of the core operating subsidiaries, as well as all Audit and Supervisory Committee members. The committee oversees compliance throughout the COMSYS Group, and strives to increase the Group's awareness of compliance and establish an effective compliance structure through various discussions. All COMSYS Group companies have set up similar compliance committees of their own. These committees work to establish an effective compliance structure by implementing educational and training programs, as part of efforts to deepen employees' understanding of the corporate policy and action guidelines of each respective COMSYS Group company.

Establishing a Risk Management Structure

To maintain and enhance corporate value amid a rapidly changing business environment, the COMSYS Group is aware that it faces a variety of business risks which must be managed appropriately. Therefore, the Group has established a Risk Management Committee, chaired by the president and made up of directors from the Company and each of the core operating subsidiaries.

The "Basic Policy on Risk Management" was formulated

in order to promote Group-wide risk management. Furthermore, similar risk management committees were established at each Group company. In this manner, efforts are being made to properly address the business risks each Group company faces and to minimize the seriousness of each risk.

The Company has formulated Risk Management Guidelines and Crisis Management Guidelines and will strive to maintain sustainable operations and ensure steady growth of the Company and the COMSYS Group by practicing effective risk management.

For example, the COMSYS Group manages operational risks by ensuring that Group companies operate in accordance with management systems, such as ISO 9001, ISO 14001, ISO/IEC 27001, COHSMS (Construction Occupational Health and Safety Management System), and Privacy Mark certifications based on the actual working environments at each Group company.

CSR Activities

The Company and the COMSYS Group have established the CSR Committee to coordinate Group-wide CSR activities with the aim of ensuring that the Group actively fulfills its economic and social responsibilities, including social contribution activities, as a good corporate citizen.

The CSR Committee is engaged in CSR activities that address various themes, such as compliance, corporate governance, risk management, information disclosure and protection, security countermeasures, social contributions, and environmental issues.

Establishing an Information Management Structure

Confidential documents and records related to business activities and execution of directors' duties, including minutes of the Board of Directors and Senior

Management Committee meetings and other reports, are stored and managed appropriately based on laws and regulations, as well as the Group's internal rules.

Furthermore, in order to improve the efficiency of operations and business execution, after ensuring an adequate level of information security, the Company is working to deploy various information systems to put in place a framework for sharing the latest management information.

Establishing a Group Management Structure

Business management of the core operating subsidiaries, which are the major subsidiaries of the COMSYS Group, is based on the "COMSYS Group Agreement." In addition, each core operating company manages their subsidiaries in which they have directly invested. The Company possesses a Group operations system that provides guidance and advice as necessary to business management conducted by the core operating subsidiaries.

Important management decisions within the COMSYS Group are reported to and discussed by the Senior Management Committee and the Board of Directors in line with Group Operation Standards, which clarify decision-making and reporting rules for the COMSYS Group. In this manner, the Group management and monitoring framework is centered on the Company.

The Company has established internal reporting liaison contacts that cover the entire COMSYS Group, both inside the Company and at an external law firm. The Company works to prevent corporate impropriety by ascertaining reports from COMSYS Group employees and others about incidents that may violate laws and regulations. The Company has also made efforts to prevent unfair treatment of whistleblowers by setting up appropriate systems in line with the Whistleblower Protection Act.

To ensure that all COMSYS Group operations are performed appropriately, the directors of each core operating subsidiary also participate as members in the various Group committees established within the Company, including the CSR Committee, the Compliance Committee, and the Risk Management Committee. In this way, the COMSYS Group ensures that all policies and decisions discussed by these groups are reported to and thoroughly implemented by each Group company.

In addition, the Group has formed the COMSYS Group Presidents Committee, which is made up of the presidents of COMSYS Group companies. This committee meets regularly and works to ensure that management policies and activities are clearly implemented by all members.

■ System to Eliminate Antisocial Forces

To fulfill our social responsibility as a company, the Company and the COMSYS Group have absolutely no relationship with any antisocial forces or groups that threaten the order and safety of civic society. Moreover, the Company and the COMSYS Group will maintain a resolute and uncompromising attitude in the face of any attempts to form a coercive relationship.

The Company and the COMSYS Group have prepared an organizational framework that enables them to block the formation of a relationship with any antisocial forces or groups, and to maintain a resolute and uncompromising attitude while cooperating with lawyers, the police, and other relevant authorities.

■ The Audit and Supervisory Committee

The Company's internal auditing organization consists of an Internal Audit Office and an Internal Control Office within the Internal Control and Audit Department.

The Internal Audit Office formulates internal auditing

policies based on top management's requirements, and conducts internal audits of the Company and all Group companies. These activities are intended to ensure that business execution is lawful and appropriate, and that each business risk faced by the Group is minimized, while maximizing the quality of business operations.

The Internal Control Office formulates operational internal control policies as regards financial reporting, and provides instructions and evaluations about the effectiveness of the internal control systems in the Company and the Group.

The Audit and Supervisory Committee comprises six members, five of whom are outside directors. To ensure the effectiveness of the Audit and Supervisory Committee's activities, the Company has established a system by which the Audit and Supervisory Committee members mutually elect a standing Audit and Supervisory Committee member who will attend important internal meetings and committees, such as the Senior Management Committee and the Compliance Committee, as a regular member to ensure that the member can constantly check the status of business execution and provide opinions.

In addition, based on the rules governing the Audit and Supervisory Committee, directors and employees of the Company and the Group are required to report on major business activities or issues that could affect the Company's operations or performance to the Audit and Supervisory Committee members. Furthermore, under the system, the Audit and Supervisory Committee members may request the directors and employees of the Company and the Group to provide the above reports or other reports considered necessary at their discretion.

The Audit and Supervisory Committee members also hold regular meetings with the president to directly express their views on issues related to business execution and other topics.

The Audit and Supervisory Committee members of the Company constantly check whether business operations are executed appropriately and effectively by maintaining close ties with the Group's independent auditor and the Internal Control and Audit Department. For example, the Audit and Supervisory Committee members accompany the independent auditor and others on on-site internal and financial audits as observers in accordance with the audit plans. Furthermore, the Audit and Supervisory Committee members hold regular meetings with the corporate auditors of the main Group companies to share information, exchange opinions, and engage in related activities to maintain close coordination within the Group and ensure the efficacy of audits.

If the Audit and Supervisory Committee requires assistance for its duties, the Company discusses the committee's needs with the Audit and Supervisory Committee members and appoints organizations and assistants. The personnel matters and transfers of the assistants are conducted after consultation with the Audit and Supervisory Committee members.

Outside Directors

The Company has five outside directors, all of whom are Audit and Supervisory Committee members. There are no personal, capital, business or other relationships between the Company and its outside directors that could impair their independence.

At the same time, regarding the independence of outside directors, the Company's policy is to register all outside directors as independent directors to ensure that they have no conflicts of interest with general shareholders. The Company has notified the Tokyo Stock Exchange of those independent directors, as stipulated by the exchange.

Furthermore, there are no personal, capital, business or other relationships between the companies that the outside directors have been associated with and the Company and the COMSYS Group that could impair their independence.

Moreover, in appointing outside directors, the Company considers the conditions for independence specified by the Companies Act and the Tokyo Stock Exchange, and emphasizes personnel who are able to advise and supervise the Company's management, having either of the following experiences or qualifications.

- (1) A person who has served as a corporate officer or management team member at another company, possessing deep knowledge of corporate management
- (2) A person with expertise in law, accounting, and so forth

All of the outside directors have either a wealth of knowledge and wide-ranging insight from their lengthy experience in various industries as corporate managers or a high-level of ability and insight into the law as attorneys. They are expected to provide appropriate advice from multiple perspectives. Furthermore, the Company judges that the outside directors will carry out their audits and supervision from an objective standpoint, and contribute to strengthening the Company's corporate governance.

■ Compensation, etc., for Directors

The following items form the basic policy for determining compensation, etc.

• The compensation structure shall drive continued enhancement of corporate value.

Type of Compensation	Item	Details
Fixed Basic compensation compensation		Basic compensation made of position-based payment that the Company stipulates based on position and of work remuneration that is calculated according with any duties performed concurrently for the presiding company. The position-based payment and payment for presiding company duties are separated and a fixed amount is paid as cash compensation.
Long-term	Share-based compensation stock options	A share-based compensation stock option system with an exercise price of ¥1 has been vested for directors, excluding members of the Audit and Supervisory Committee. The number of shares granted is determined by the basic remuneration of each director. The percentage of compensation the Company pays is determined by the duties each director carries out for the Company or presiding company.
incentive-based compensation	Ordinary stock options	An ordinary stock option system with an exercise price of equal to or higher than the market value at the time of issuance has been introduced for directors, excluding members of the Audit and Supervisory Committee. The number of shares granted is determined by the basic remuneration of each director. The percentage of compensation the Company pays is determined by the duties each director carries out for the Company or presiding company.
Performance-based compensation	Bonus	Bonus is calculated by multiplying basic compensation and indices that take into account a set of performance evaluation metrics and is paid in cash. Performance evaluation metrics are based on consolidated net sales and consolidated operating profit growth compared to the previous year and the degree of achievement of the business plan, which are recognized as key performance indicators for the Company. In addition, a qualitative evaluation of performance of net sales and operating profit compared with those from the previous year and the business plan at presiding companies directors concurrently working is reflected in the calculation of bonus.

Compensation shall ensure appointment of outstanding talents as directors who implement the corporate vision.

The system for compensation, etc., and a summary of performance-based compensation are outlined in the previous table. Compensation is categorized into fixed compensation, long-term incentive-based compensation, and performance-based compensation.

To ensure compensation, etc., is objectively appropriate and remains within the limit approved by the General Shareholders' Meeting, amounts are deliberated by the Nomination and Remuneration Advisory Committee, including outside directors. The Board of Directors takes into account the discussions at the committee and makes resolutions.

The following items are the basic policy on deciding the amount of compensation, etc., for directors who are members of the Audit and Supervisory Committee.

- Compensation shall attract talents who are able to perform auditing duties or supervision, etc., of execution of duties.
- Compensation shall ensure appointment of talents who are able to supervise and oversee the appropriateness of management as well as participate in management's judgment and decision-making.

To ensure directors who are members of the Audit and Supervisory Committee conduct their duties in an appropriate manner, compensation shall be a fixed payment consisting only of basic compensation in principle. To ensure compensation etc., is within the limit approved by the General Shareholders' Meeting, amounts are deliberated by the Audit and Supervisory Committee, and the Board of Directors will make resolutions.

Corporate Social Responsibility (CSR)

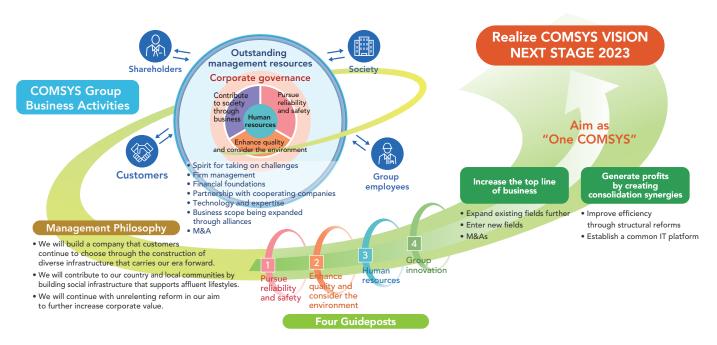

Basic Approach to CSR

In this information-rich society, the role of the COMSYS Group is to build a reliable, safe, and convenient networked society and support the networks that connect every corner of society like clockwork. We consider this our responsibility to society as a corporation.

The COMSYS Group promotes its CSR activities under the CSR concept that we are contributing to the creation of a society where telecommunications networks foster more meaningful relationships among people, and between people and their communities. We see our basic CSR activities as a social contribution made through business activities. Moreover, the Group cares for the environment as it undertakes development of a wider infrastructure, and will help to create an information-rich society that coexists harmoniously with the global environment.

As a member of society, the COMSYS Group aims to become a corporate entity that is trusted and loved by many stakeholders, including customers, local communities, shareholders, and employees. We will also engage in CSR activities to achieve sustainable growth.

COMSYS Group Value Creation Process

For the COMSYS Group, CSR activities are an important element in supporting value creation.

With human resources as its core, the COMSYS Group engages in business activities with a strong awareness of our priority challenges, which are to "pursue reliability and safety," "enhance quality and consider the environment," and "contribute to society through business." We strive to strengthen governance, which is the management foundation that supports these activities.

In addition, with our management philosophy, the Group aims to realize business expansion, maximize utilization of human resources, and promote structural reforms, as called for by our medium- to long-term vision.

By establishing the four guideposts, the COMSYS Group is moving through a short-term PDCA cycle for each goal, and boosting the realization of the medium- to long-term vision.

Corporate History

October 2018

Consolidation with NDS Co., Ltd., SYSKEN Corporation, and Hokuriku Denwa Kouji Co., Ltd. was effected.

June 2017

Changed from a company with an audit and advisory board to a company with an audit and supervisory committee.

July 2013

Delisted from Osaka Stock Exchange (currently Osaka Exchange) owing to its stock market integration with that of the Tokyo Stock Exchange.

October 2010

Consolidation of TSUKEN Corporation effected.

June 2009

Minimum share purchase unit reduced from 1,000 shares to 100 shares.

April 2009

The information systems business related to software development outsourcing was spun off from Nippon COMSYS Corporation to form COMSYS JOHO SYSTEM Corporation.

April 2007

COMSYS Holdings Corporation converted COMSYS Shared Services Corporation, previously a consolidated subsidiary of Nippon COMSYS Corporation, into a wholly owned consolidated subsidiary in order to clarify its role as a common provider of business process outsourcing services for the COMSYS Group.

October 2005

COMSYS Holdings Corporation converted Kokusai Densetsu Co., Ltd. (now COMSYS WING Corporation) into a wholly owned subsidiary through a stock exchange, and made Kokusai Densetsu a wholly owned subsidiary of Nippon COMSYS Corporation on the same day.

April 2005

SANWA ELEC Co., Ltd. was renamed SANWA COMSYS Engineering Corporation.

January 2005

The NTT Information Telecommunication Engineering Business of SANWA ELEC Co., Ltd. was centralized at Nippon COMSYS Corporation.

September 2004

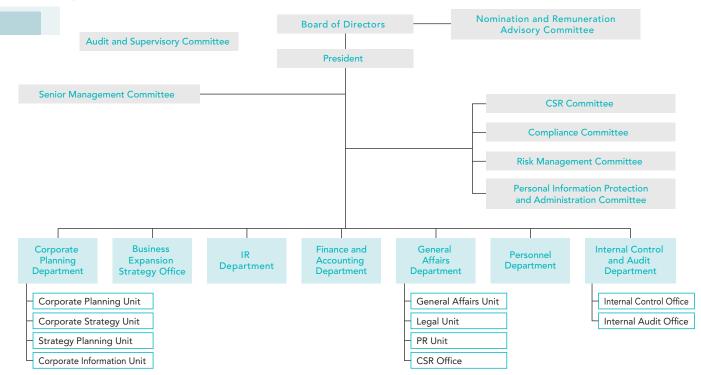

COMSYS Holdings Corporation subscribed to a third-party allotment of shares by SANWA ELEC Co., Ltd.

September 2003

COMSYS Holdings Corporation, a pure holding company, was established and listed on the First Section of the Tokyo Stock Exchange and the Osaka Securities Exchange in a three-way share transfer between Nippon COMSYS Corporation, Sanwa COMSYS Engineering Corporation, and TOSYS Corporation. Nippon COMSYS Corporation and Sanwa COMSYS Engineering Corporation were delisted concomitant with the establishment of COMSYS Holdings Corporation.
